## Decontamination & Remediation

Every day, our OSHA trained HAZMAT first responders are disinfecting, deep cleaning and restoring office buildings, subways, warehouses, AMTRAK, retail shops, banks, schools and hotels. From an MTA station to a 30-floor multi-use building, PPM has the capability to decontaminate personnel, equipment and facilities where hazardous Materials, non-hazardous materials, and infectious substances have been released.

## Vehicle & Fleet Services

- + Custom on-site mobile decon wash stations for fast and efficient cleaning
- + HEPA vacuuming of all interior areas including floor mats
- + Dry fogging for interior seats, dash, floors, and wheels
- + Atomized misting for rear cargo areas and loose hand tools
- + Hand-wiping for all "high-touch" surfaces interior and exterior

For over 20 years, PPM Site Services has been at the forefront of the environmental industry delivering a wide range of emergency response services. Our crews respond to oil spills, hazardous material releases, hurricanes, floods, biological terror attacks (anthrax), avian flu outbreaks, and the coronavirus pandemic. Our industry leading personnel and equipment are relied on for comprehensive emergency clean up and decontamination of spaces and fleets in the most sensitive areas. PPM brings an arsenal of the latest equipment and a team of OSHA trained HAZMAT first responders.

## Leading with Experience & Equipment

Our arsenal of OSHA trained HAZMAT first responders are uniquely suited to handle the sterilization & clean up. State-of-the-art equipment including the Odorox® Boss MDU and the Steramist® Binary Ionization technology is military tested & approved. PPM Site Services will restore and remediate industrial, commercial facilities and command centers.
